

MUHAMMAD MUSAB BIN UBAID

+92-306-7674978 • buildwithmusab@gmail.com • <https://www.linkedin.com/in/musabbinubaid/>

Full-stack engineer building scalable, high-performance products using MERN, Next.js, and cloud technologies (AWS), with a focus on AI-driven solutions. Skilled in APIs, system design, and data analysis, I emphasize clean architecture and user-centric problem solving. Driven by impact, rapid learning, and delivering reliable, production-ready software.

Technical Skills

- **Frontend:** React, Next.js
- **Backend:** Node.js, Express.js, MongoDB, MySQL, REST APIs
- **DevOps & Cloud:** AWS, Docker, Linux, CI/CD, Deployment
- **Languages:** JavaScript, TypeScript, Python, C++
- **Concepts:** System Design, Cloud Architecture, Scalability, Monitoring

Education

FAST National University of Computer & Emerging Sciences
BS Software Engineering (3.24)

Islamabad, Pakistan
2022 – 2026

Professional Experience

AMAL ACADEMY

Islamabad, Pakistan

Education startup funded by Stanford University that teaches professional skills to students and corporations

Career-Prep Fellow

Aug 2025 – Nov 2025

- Selected from 4,500+ applicants for a Stanford-funded fellowship; completed 150+ hours of training in communication, leadership, problem-solving, and teamwork.

CHRIO

Islamabad, Pakistan

Chrio is an AI-powered sports infotainment platform delivering real-time insights and analytics to enhance live match engagement.

Full Stack Developer

Jun 2025 – Aug 2025

- Developed and deployed full-stack features for a real-time AI-powered sports platform, ensuring scalable architecture, efficient APIs, and reliable performance.

Projects

HomeEase – AI-Powered Home Services Platform

[Github Link](#)

- Developed a smart home services app using AI-driven recommendations to match users with relevant service providers. Integrated an AI chatbot and optimized backend systems for scalable, efficient, and data-driven performance.

Ham Raah- Smart Ride-Sharing for Students

[Github Link](#)

- Built a ride-sharing platform incorporating intelligent matching logic to efficiently connect students based on routes, timing, and preferences. Designed the system to enable data-driven decision-making for route optimization and cost efficiency while ensuring secure authentication and real-time ride coordination for a seamless user experience.

Multi-Vendor eCommerce Store

[Github Link](#)

- Developed a scalable multi-vendor eCommerce platform with architecture designed for AI-driven personalization and recommendation capabilities. Structured backend systems to support user behavior tracking, analytics, and future AI integration, enabling data-centric decision-making and improved user engagement while maintaining secure and efficient platform operations.

Honors and Awards

Dean's List of Honors | *Fall 2024 & Spring 2024*

- 3.7 + SGPA in Consecutive Semesters
