github.com/TechMusab | portfolio-musab-joiya.vercel.app/

Aspiring Software Engineer with hands-on experience in building scalable full-stack applications using modern web technologies. Proficient in designing RESTful APIs, developing responsive user interfaces, and working with cloud and DevOps tools. Strong foundation in data structures, problem-solving, and system design, with a passion for building efficient, real-world software solutions.

Technical Skills

- **Frontend:** React.js, Next.js, React Native, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** PostgreSQL, MySQL, MongoDB
- **DevOps & Cloud:** AWS, Docker, Linux, CI/CD, Kubernetes, Git, GitHub, Deployment
- **Languages:** JavaScript, TypeScript, Python, C++, C#

Education

FAST National University of Computer & Emerging Sciences
BS Software Engineering (CGPA:3.24)

Islamabad, Pakistan
Aug 2022 – Jun 2026

Professional Experience

CHRIO

Islamabad, Pakistan

Chrio is an AI-powered sports infotainment platform delivering real-time insights and analytics to enhance live match engagement.

Full Stack Developer

Jun 2025 – Aug 2025

- Built and optimized scalable frontend modules using React.js and Next.js, supporting 10K+ concurrent users.
- Designed and integrated RESTful APIs, enabling real-time data flow and efficient client-server communication.
- Improved performance and reusability by implementing modular components, hooks, and structured state management.

AMAL ACADEMY

Islamabad, Pakistan

Education startup funded by Stanford University that teaches professional skills to students and corporations

Career-Prep Fellow

Aug 2025 – Nov 2025

- Selected from 4,500+ applicants for a Stanford-funded fellowship.
- Developed communication, teamwork, and problem-solving skills through 150+ hours of training.

Projects

HomeEase - AI-Powered Home Services Platform(FYP)

[Github Link](#)

- Developed a cross-platform mobile app using React Native to connect users with verified home service providers for household tasks.
- Solved a real-world problem for busy elite and upper-middle-class users by enabling quick, reliable, and efficient service booking.
- Built scalable architecture with REST APIs and integrated an AI chatbot to automate user queries and enhance user experience.

Ham Raah - Smart Ride-Sharing for Students

[Github Link](#)

- Developed a real-time ride-sharing mobile app using React Native for efficient student commute coordination.
- Integrated backend APIs and implemented scalable, component-driven architecture for a smooth and reliable user experience.

Multi-Vendor eCommerce Store

[Github Link](#)

- Built a scalable React.js-based eCommerce platform supporting multiple vendors and dynamic product listings.
- Implemented cart management and REST API integration with reusable components for a seamless user experience.

Additional

- Honors & Awards: Dean's List of Honors | Spring 2024 & Fall 2024
- Interests: History, Social Science, Technology Management
